Mobile Sales Insights Report

Summary

This report analyses mobile device sales data across India spanning 2021–2024, covering 3,835 transactions, five major brands (Apple, Samsung, OnePlus, Vivo, Xiaomi), 19 cities, 15 mobile models, and four payment channels. The total revenue stands at ₹769 million across approximately 19,150 units sold. Apple leads in total revenue (₹161.6M), while UPI dominates as the preferred payment method (26%). Delhi alone accounts for 26.5% of national sales, and customers aged 46–60 contribute the highest sales volume. The majority of customers gave 5-star ratings, reflecting strong satisfaction—yet a notable share of 1–2 star ratings warrant attention.

Impact of Creating Dashboard:

- To track monthly sales performance
- To analyze revenue trends over time
- To identify top-performing products and regions
- To monitor key performance indicators (KPIs) such as total sales, profit, and quantity

Data preprocessing steps included cleaning the data, handling missing values, formatting date fields, normalizing data fields, and extracting date formats from existing day and year columns. Transformed data included additional columns such as Price Category and Buyer's Age Group, along with calculated columns like Total Sales, Total Quantity, and Transactions. These tasks were performed within Power BI using Power Query and DAX.

Insights and Analysis

- Apple leads revenue but by a razor-thin margin over Samsung (₹1.6M gap) — brand dominance is highly contested.
- Xiaomi rates highest (3.72★) despite lowest revenue -a strong value-for-money perception.
- All five brands maintain near-identical market share (~20%), indicating no single dominant player.
- UPI leads with ₹201.7M in revenue — digital payments are firmly mainstream in Indian mobile retail.

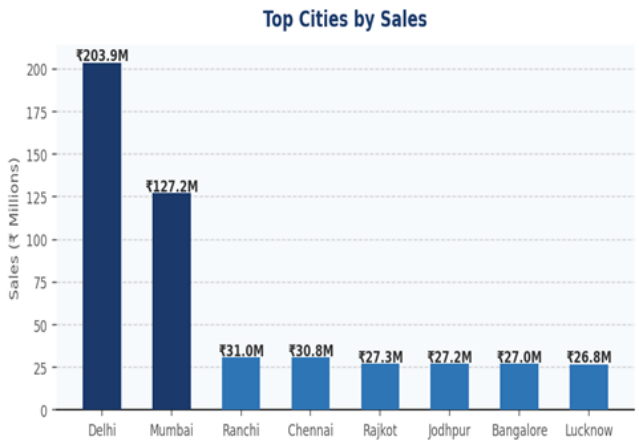
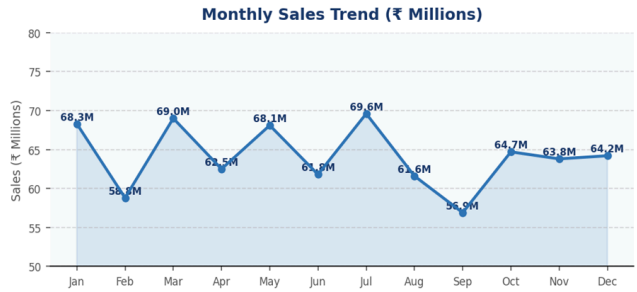
Department of Artificial Intelligence & Machine Learning





- Cash remains relevant at 24.1% - non-digital customers in Tier 2 cities should not be overlooked.
- September (₹56.9M) is the weakest month - a strategic opportunity for targeted discounting.
- Strong Q1 and Q3 suggest sales campaigns should front-load budget in these quarters.
